Experience

Clinical Innovation Analyst/ Developer

DaVita Rx

Feb 2016 - Present

Orlando, Florida Area

Projects Overview:

Database Report Automation:

Automated process of obtaining data from Oracle Database utilizing PL/SQL. Use queries to clean and analyze the data based on criteria requirements. Generate reports based on analysis and upload to SFTP server.

Auto-Fax Application:

Designed and developed a C# autofax application that auto-populates custom designed fax forms and sends autonomously to desired online based fax service.

Sharepoint Design & Development:

Design & develop intranet sites for Patient Adherence Call, Specialty Projects and the Clinical Innovation Team Gather SharePoint data to automate the process of generating analysis reports by utilizing SharePoint's REST APIs, Web-Requests and SOAP XML.

Tableau Reporting:

Connect to several different data sources for analysis

Perform calculations to obtain and display data requested in the required format

Design, Develop and Deploy Dashboards

Experience

Clinical Innovation Project Specialist

DaVita Rx

Feb 2015 - Feb 2016

Orlando, Florida Area

Projects Overview:

Med Protect:

Provided UI design and SME analysis for an online internal project that identifies the need for an intervention by aggregating a patient's demographic, medication history, lab results, disease states, and allergy information. Med Protect Utilizes a proprietary rules engine.

Logo Design:

Designed logos for internal web applications

Script Med:

Designed and developed Care Management Protocols and Data Elements inside the Pharmacy Software System for the Pharmacy Specialty Team. Designed fax forms for specific disease states.

Experience

Clinical Operations Project Specialist

DaVita Rx

Aug 2014 - Feb

2015 Orlando, Florida Area

Projects Overview:

eFax Form Tool:

Created, designed, developed, deployed and currently support a desktop application in which custom fax forms are auto generated based on a prescription number. Application increased production, lowered cost and increased accuracy. The time taken to perform these tasks was decreased by 89%. I Provided several different versions of the application to different departments, based on specific requirements.

Fax Forms Re-design:

Re-designed fax forms, in which prior were manually created and populated. The re-design increased accuracy and provided a cohesive branding across all mediums.

Experience

Certified Pharmacy Technician / Tech Translation
